Restriction

For applicant's information, the numbering of the claims is improper and not in compliance with the Rules of the MPEP, specifically, 1.75(f). Specifically, between claims 22 and 23, applicant has claims "22.1" (which,, for purposes of this restriction, has been grouped below in Group I, claims 1-53). It is required that applicant renumber the claims appropriately in compliance with the MPEP. For applicant's further information, claim 30 appears to be missing text and does not state what claim it is dependent from. For purposes of this restriction it is assumed to depend from claim 1.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-53, drawn to a machine-implemented method for a progressive optical device, classified in class 351, subclass 177.
- II. Claims 54-68, drawn to an optical device or lens, classified in class 351, subclass 169.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process in that the optical device or lens and surfaces of the optical device or lens can be made by any known method of forming lens surfaces, specifically, any method that does not require defining a triangulation grid

over a design field or by any method that does not take into account a power deviation function as well as any method that does not require solving a variational equation on a triangulation grid.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
